SERVICE

We have been developing lights for the building materials stores and other large spaces for many years. Why not make good use of our considerable experience gained in working for branded stores and shops in a variety of industries.

Look beyond the obvious and profit from the ideas of innovative planners in architecture, shop-building and decoration.

Our field staff will be happy to help you on-site.

EFFICIENT LIGHT

**AMBIENT
LIGHTING.**

FASCINATING LIGHT.

A successful presentation of special sales areas determines the sales success. Light emphasises the quality of the goods and engenders positive emotions. Decorative fabric pendulum lights act as eyecatchers and draw customers specifically to the desired showcase.

ENTIRELY NATURAL.

An incorrectly selected light source means that structures can no longer be seen, and wood appears faded and cold. The right lighting is key when it comes to presenting the natural and individual nature of wood in the right light. The appropriate selection of the light colour and the optimum control of the lighting are essential for perfect results.

Effectively used light and the playful treatment of light and shadow brings life to sales spaces.

LIGHT CREATES.

Light is a key design element.

The correctly selected lighting not only enhances the furniture, it also sets accents and creates a homely atmosphere.

Office and consultation areas are perfectly illuminated with panel lights.

The low levels of heat generated by LEDs ensure a pleasant atmosphere for both staff and customers.

Perfect aisle lighting is designed to complement the shape of the walls and shelves and radiate evenly to the right and left.
